PROFESSIONAL SUMMARY

After being a front-end web developer developing customer-facing websites for three years, I am moving forward to become a full-stack web developer specializing in the NERDS stack. I have a proven ability to execute technology projects by writing clean code, doing unit testing, and coordinating various functions to deliver products to end-users. Currently, I am looking for a full-stack development job.

Profession: JavaScript, HTML5, CSS3, SASS, SCSS, Material UI, React, Redux, Node.js, Express, Sequelize, PostgreSQL, webpack, socket.io, OAuth, Git, GitHub, Jasmine, Mocha, Chai, SuperTest

Knowledgeable: Travis CI, TypeScript
